Authorization for this examiner's amendment was given in a telephone interview with Mr. John P. DeLuca (Registration No. 25,505) on September 23, 2004.

Claim 2 has been cancelled.

Allowable Subject Matter

4. The following is a statement of reasons for the indication of allowable subject matter:

The instant invention recites a method of telemicroscopy and telemicroscopy apparatus comprising:

Art Unit: 2623

imaging a microscopy slide of a complete specimen using the high power objective lens of a microscope to generate the complete specimen image in a single scan at high magnification and high resolution by generating a continuous sequence of successive images while advancing the field of view of the high power objective lens of the microscope stepwise across the complete specimen and acquiring successive images of each field of view of the complete specimen. A relatively low resolution copy of the composite image of the complete specimen will be obtained afterwards.

The invention further recites transferring the low resolution copy of the image data from the datastore to a remote terminal for displaying a corresponding low resolution image, as a navigation map, upon a monitor of the terminal and, in response to a selection, by a user of the terminal, of an area of the navigation map, transferring corresponding high resolution image data for the selected area of the image from the datastore to the terminal.

5. The features identified, in combination with other claim limitations, are neither discussed nor suggested by the prior arts of record.
6. Claims 1, 3, 5-12 and 14-25 are allowed.
7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
